KEY WORD INDEX
VOLUME 5, 1991

Note: In brackets, abs indicates abstract, br indicates book review, and let indicates letter to the editor.

ablation, seminal vescicle/coagulating gland, rats, 347
acetaldehyde, preimplantation mouse embryos, 405
acetylaminofluorene, 2-, WEC, 259
acridine orange, human sperm, 115
acyclovir, diastematomyelia, fetal, 517
AEDs, reproductive consequences, 179
alcohol dehydrogenase, preimplantation mouse embryos, 405
amantadine hydrochloride, fetal outcome, 65
androgen metabolism, 139
androgenization, xenobiotic estrogens, 363
animal models, anticonvulsant drugs, 281
antiepileptic drugs, reproductive consequences, 179
anticonvulsants
  animal models, 279
  human studies, 301
assay, sperm chromatin structure, 115
autometallography, 205
awards, graduate/postdoctoral student, 531
Ayurvedic Medicinal Plants, [br] 85

benzo(a)pyrene, ovarian effects, 379
biotransformation, 473
birth defects, anticonvulsant drugs
  animal models, 281
  Chemically Induced, [br] 459
  human studies, 301
  Teratogens, Chemicals Which Cause, [br] 459
  buffers, HCl, NaOH, effects, WEC, 270

cadmium, LHRH-induced LH release, 199
California, proposition 65, 169, 175 [let] 525
carbohydrate, WEC, 229
carbon monoxide, pregnancy, fetus, 397
carboxylic acids/valproic acid, transfer, activity, 269
Cardiac Problems, Pregnancy, [br] 521
cardiovascular effects, cocaine, pregnancy, 99
CASA, rat, 449
categorization of drugs, pregnancy, FDA, [let] 393
CellSoft, rat sperm motility analysis, 387
cerebral vascularization, rat embryo culture, 265
chemicals, classification, WEC, 267
chlorinated pesticides, estrous cycle, female rat, 65
cholesterol, WEC, 245
chromium, hexavalent, rat testis, 443
chromosome aberrations, ethanol, 405
classification of drugs, pregnancy, FDA, [let] 393
clearance, rat fetus, 411
cleavage, cyclophosphamide, 73
coagulating gland/seminal vesicle ablation, rats, 347
cocaine
  cardiovascular effects, pregnancy, 99
  marijuana, designer drugs, [br] 273
  neuroteratology, 89
computer-assisted sperm analysis, rat, 449
convulsions, anticonvulsants, 279
copulatory plug deficits
  finasteride, 353
  seminal vesicle ablation, 347
culture media
  postimplantation embryos, 223, 417
cyclic nucleotides, 473
cyclophosphamide
  bioactivation, 270
  oocyte, 65
  ovarian toxicity, 379
  short-term toxicity, rat, 481
cytochrome P450
  prodysmorphogens, 259
  WEC, 473
cytotoxicity test, embryonal stem cells, 57

DDT, *o,p'-*, pituitary responsiveness to GnRH, rats, 363
DES
  estrogenized male rats, 149
  pituitary responsiveness to GnRH, rats, 363
designer drugs, cocaine, marijuana, [br] 273
developing fetus, mean residence time, 411
developmental
  delay, anticonvulsants, human, 301
  toxicity, phenols, 255
  Toxicology, In Vitro Methods, [br] 85
  variations, WEC, 270
dialyzed serum, 223
diastematomyelia, fetal, acyclovir exposure, 517
diethylstilbestrol, androgen, 149
distribution, steady-state volume of, 411
diurnal variation, folate, 465
DNA denaturation, 115
Drug Safety in Pregnancy and Lactation, [br] 459

eating behavior, chlorinated pesticides, 65
EDS, testis, 39
embryo
  culture, morphogenesis, 229
  rat, EGdiME, 157
  valproate exposure, 245
Embryology, Langman's Medical, [br] 391
embryonic
  development, ethanol, 405
  dosimetry, WEC, 255
  stem cells, 57
embryotoxicity, P450-catalyzed dealkylation, 473
endometrial histamine, 526

Endowment Fund, Susan Fiery Hughes, 277, 462, 530
endpoints, WEC, 237
ENTIS, OTIS, teratology information networks, 395
epilepsy
  anticonvulsant drugs
    animal studies, 281
    human studies, 301
  drug therapy, effects, 179
estradiol
  chlorinated pesticides, female rat, 65
  genistein, 127, 133
  methoxychlor, 427, 437
estrogenization, neonatal, 149
estrous cycle, chlorinated pesticides, 65
estrus, persistent, methoxychlor, 139
ethane dimethanesulphate
  sperm motion, method of collection, 39
  testicular effects, 497
ethanol, preimplantation mouse embryos, 405
ethylene glycol dimethyl ether, perinatal rat, 157
European Network of Teratogen Information Services, 395
evaluation, interlaboratory, culture media, 417
Expert Witnessing, Effective, [br] 521
explanting early postimplantation embryos, 268

FDA categorization of drugs, pregnancy, [let] 393
fecundity
  cyclophosphamide, female rat, 481
  radiation, toxicity, 385
fertility
  assessment, 353
  impairment, rat, sodium fluoride, 505
  finasteride, rat, 337
  sewer wastes, 31
fetal outcome, amantadine hydrochloride, 65
finasteride
  copulatory plug formation, 353
  fertility, male rats, 337
flow cytometry, human semen, 115
folate, diurnal variation, valproic acid, 465
folinic acid, valproic acid, 465
follicle
  loss, mouse, 379
  female rat, cyclophosphamide, 481

genistein
  subacute administration, 133
  GnRH-induced LH secretion, 127
genital tract, male, 149
gestation, amantadine, hydrochloride, 65
glutathione levels, vanadium, 513
GnRH, DES, *o,p'*-DDT, 363
GnRH-induced LH secretion, genistein, 127
gonadotrophins, neonatal rats, dimethanesulphonate, 497
gonadotropin-releasing hormone, 133
granulosa-luteal cells, vinblastine, in vitro, 371
growth
  retardation, anticonvulsants, human, 301
  neonatal rats, dimethanesulphonate, 497
  WEC, 229

hazard identification,
  proposition 65,
  California, 169, 175, [let] 525
hCG, vinblastine, 371
HCl, NaOH, buffers, effects, WEC, 270
heparin plasma, WEC, 266
hepatocytes, embryos, medium, sequential culture, 268
histamine, endometrial, 526
histology
  methoxychlor, 437
  WEC, 269
HPLC method, folinic acid, 465
Hughes, Susan Fiery, Endowment Fund, 277, 462, 530

Illicit Drugs, Physiopathology, Symposium, 389
ILSI Committee, Proposition 65, California, 525
implantation
  endometrial histamine, 526
  experimentally delayed, lead, 53
In Vitro
  Culture of Postimplantation Rodent Embryos, proceedings, 221
  fertilization, cyclophosphamide, 65
  Methods in Developmental Toxicology, [br] 85
in vivo verfication, WEC, 237
Inheritance, Mendelian, Man, [br] 391
interlaboratory validation, screening, 267
International Life Sciences Institute–Nutrition Foundation, [let] 521
intrauterine insemination, 347
iron-deficiency, lead, rats, 211
kidney, fetal, lead, 211
Lactation, Drugs in Pregnancy and, [br] 459
Langman's Medical Embryology, [br] 391
lead
  nitrate effects, WEC development, 269
  blastocyst, mouse, 53
  fetal kidney, iron-deficient rats, 211
  oral, reversibility, female rats, 45
Leydig cells
  mercury, rat testis, 205
  ethane dimethanesulphonate, 497
LH, xenobiotic estrogens, 363
lipid
  peroxide levels, vanadium, 513
  synthesis, WEC, in vivo & in vitro, 245
lordosis, chlorinated pesticides, 65
luteinizing hormone
  cadmium, 199
  ovariectomized rat, 127, 133
  releasing hormone, cadmium, 199

male
  genital tract, 149
  reproductive physiology, 449
marijuana, cocaine, designer drugs, [br] 273
Maternal–Fetal Toxicology, A Clinicians' Guide, [br] 164
mean residence time, rat fetus, 411
Mendelian Inheritance in Man, [br] 391
mercury, rat testis, 205
metabolic activity, yolk sac tissue, 267
metabolism, WEC, 229
methoxychlor
  adult female mouse, 139
  protein secretions, mouse uterus, 437
  young mice, vagina/uterus, 427
Micromass Teratogenicity Test, validation, 271
morphologic features, quantitative evaluation, WEC, 270
morphology, valproate, 245
motion analysis, rat sperm, 449
MTT assay, 57

NaOH, HCl, buffers, effects, WEC, 270
neonatal rats, ethane dimethanesulphonate, 497
networks, teratology information, 395
neural cells, influence of culture, mouse embryos, 266
neural plate, regulation, development, 268
neural tube
  closure delay, quantification, 267
  defect, ovulation induction, 83
neuroteratology, cocaine, 89
neurulation, maternal serum protein, 265
nutrient requirements, WEC, 223

obstetrics, amantadine, 65
occupational exposures, SFRs, 31
Organization of Teratogen Information Services, 395
OTIS, ENTIS, teratology information networks, 395, 463
ovarian
  failure, cyclophosphamide, 65
  toxicity, random/serial sections, 379
ovariectomized
  mice, methoxychlor, 437
  rat
    estrogens, naturally occurring, 133
    luteinizing hormone, 127

ovary
female rat, cyclophosphamide, 481
methoxychlor, 139
ovulation
cadmium, 199
induction, neural tube defects, 83

pesticide, protein secretions, mouse uterus, 437
pharmacokinetics
rat fetus, 411
WEC, 237
phenols, developmental toxicity assays, 255
phenylalanine, PKU, 266
phenylketonuria, phenylalanine, 266
phenytoin
human studies, 279, 281, 301
morphogenic abnormalities, 281
phosphodiesterase inhibition, 473
phospholipids, membrane synthesis, 245
pituitary
genistein, 127
naturally occurring estrogens, 133
responsiveness to GnRH, DES, rats, 363
PIXE, lead, mouse blastocyst, 53
PKU, phenylalanine, 266
postimplantation embryo culture, 223, 417
pregnancy, amantadine, 65
preimplantation period, ethanol, 405
progesterone
challenge, LH levels, 133
genistein, 127
receptor, chlorinated pesticides, 65
release, vinblastine, 371
Proposition 65, California, 169, 175
protein
secretions, methoxychlor, 437
uptake, WEC, 229

radiation, toxicity, fecundity, 385
rat embryo, EGdiME, 157
rat serum, 223
reactive intermediates, WEC, 259
Recurring Silent Spring, [br] 274
reductase, 5-alpha-,
finasteride, 353
inhibitor, male rats, 337
reproductive toxicity, finasteride, male rats, 337
resorufin ethers, 473
retardation, WEC, 237
retinoic acid, 13-*cis*, all-*trans*, WEC 266

SCSA, 115
section counting, random vs serial, 379
semen quality, human, 115
seminal vescicle/coagulating gland ablation, rats, 347
Sertoli cells, mercury, 205
sexual
behavior, female rat, chlorinated pesticides, 65
dimorphism, DES, *o,p'*-DDT, rats, 363
SFRs, industrial wastes, 31
Silent Spring, Recurring, [br] 274
sister chromatid exchange, ethanol, 405
sodium fluoride, rat, 505
sperm
chromatin structure assay, 115
methodologic issues, rat, 449
motility, rat, computer-assisted motion analysis, 387
motion, 39
transport, 347
velocity, 449
standard fertility rates, 31
statistics
rat sperm motility, 387
WEC, 237
stem cells, embryonic, 57
structure–activity relationships, WEC, 255
student, graduate/postdoctoral awards, 531
styrene, occupational exposure, 3
substance abuse, prenatal, 87
Teratogen Information Services, 463
International Conference, 167
teratogenicity
screening in vitro, 57
EGdiME, 157
valproic acid, folate, 465
teratogens, epilepsy
animal models, 279, 281
human studies, 301
testicular
chromium, ultracellular changes, 443
effects, ethane dimethanesulphonate, 497
/liver effects, vanadium, 513
testis
ethane dimethanesulphonate, 39
neonatal rats, dimethanesulphonate, 497
testosterone, neonatal rats, dimethanesulphonate, 497
thalidomide, S9-mix, various species, 269
Therapeutics, Pharmacologic Basis, Goodman & Gilman's, [br] 391
Toxicology, Fifth International Congress of, [br] 163

ultrasound, diastematomyelia, 517
uterus
methoxychlor, 437
vaginal surfaces, 427

validation studies, 265, 267
valproate, membrane lipid synthesis, 255
vanadium, liver/testicular effects, rat, 513
vasal injection, sodium fluoride, rat, 505
videomicrography, rat sperm motility, 387
vinblastine, granulosa-luteal cells, in vitro, 371
vinylcyclohexene diepoxide, ovarian toxicity, 379
vinylcyclohexene, 4-, ovarian toxicity, 379
visceral yolk sac
depentylase activities, 473
cytochrome P450 isoforms, 259

whole embryo culture
artifacts, 237
chemicals, classification, 267
comparison, two rat strains, 268
phenylalanine, PKU
